

Matías Agustín Viglianco

AI Integrations & Full Stack Engineer | Software & Data Architecture | Automation & Applied AI

Córdoba, Argentina | LinkedIn: [matías-agustín-viglianco](#) | Portfolio: [mativiglianco.github.io/portfolio-astro](#)

Professional Summary:

- **Full Stack Engineer** specialized in **AI integrations**, software architecture and data architecture for internal business products.
 - I build solutions for **CRM**, commercial analytics, operational automation, bulk data imports, **financial reconciliation** and executive reporting.
 - Production integrations with **Meta/WhatsApp Business Platform** (webhooks, templates, conversational bots) and Argentine tax authority services **ARCA/AFIP** (WSCPE, SOAP/WSAA, electronic waybills).
 - **Applied AI in production**: transcription and summarization of sales audios with Gemini/OpenAI, AI-assisted OCR and AI-assisted reconciliation.
 - Backend with **Django/DRF** and async processing with **Celery/Redis**; frontend with **React**; data on **PostgreSQL**.
 - Infrastructure and deployment: **Docker**, Nginx, VPS, GitHub Actions, Dokploy and S3/MinIO storage.
 - Experience in **Web3**: Solidity, smart contracts and decentralized prototypes.
-

Technology/Methodology:

Python, Django/DRF, FastAPI, Celery, Redis, React, TypeScript, JavaScript, Node.js, Astro.js, Tailwind CSS, PostgreSQL, MySQL, MongoDB, Firebase, Gemini API, OpenAI API, WhatsApp Business Platform, ARCA/AFIP (WSCPE, SOAP/WSAA), OCR, PyMuPDF, Docker, Nginx, Dokploy, VPS, GitHub Actions, CI/CD, MinIO/S3, Linux, Pandas, PyTorch, R, Excel/Google Sheets, DDD, REST APIs, Solidity, Hardhat, Web3, AWS.

Languages:

Spanish (Native), English (B1 - EF SET 44/100)

Work Experience:

MolinosMarimbo

Feb 2026 - Present

• AI Integrations & Backend Engineer | Part-time (Hybrid)

Design and development of an internal suite for commercial CRM, financial reconciliation, legacy ERP migration and operational reporting with Django + React.

Responsibilities:

- **Multi-channel WhatsApp CRM**: unified inbox for several company numbers (customers, internal team, waybills) with resolution states, alerts, history and reports.
- **AI transcription and summarization of sales audios** (Gemini/OpenAI) for seller and customer follow-up, with async processing.
- **Conversational bot for electronic waybills**: dialogue-driven data capture, validation and issuance against **ARCA** (WSCPE, SOAP/WSAA), with a state machine and persistent sessions.
- **AUMAX unloading module**: integration with the weighing scale system (axControl) and ARCA to generate the entry ticket as a PDF and deliver it to the trucker via WhatsApp (CTG, waybill, grain, weights).
- **Payslips**: master PDF parsing, matching by national ID, **certified digital signature** (P12) and WhatsApp delivery through a secure portal with OTP validation.
- Bulk imports, deduplication, snapshots, backfills and consistency of commercial, financial and historical data.

Stack: Python, Django/DRF, React, PostgreSQL, Celery, Redis, WhatsApp Business Platform, ARCA/WSCPE, PyMuPDF, MinIO/S3, Docker, Nginx, VPS.

Freelancer.com

Feb 2025 - Present

• Full Stack Developer | Automation, Data & Web3 | Contract

Full stack solutions, automations and technical prototypes for administrative, financial and operational processes.

Responsibilities:

- Internal applications with **Django/DRF, React, PostgreSQL and Docker**.
- Desktop automations packaged as **.exe** for administrative tasks and **automatic invoicing**.
- Bots connected to external APIs, including a **Binance futures trading bot** with trading rules and risk control.
- **Web3** projects with Solidity: smart contracts, NFTs, tokens and Chainlink experiments.
- VPS deployments and CI/CD pipelines with Docker, GitHub Actions and Dokploy.

Stack: Python, Django, FastAPI, React, TypeScript, PostgreSQL, Docker, Binance API, Solidity, GitHub Actions, Dokploy.

Revelo

Jun 2023 - Jan 2025

• AI Engineer / Prompt Engineer | Contract (Remote, USA)

Quality and accuracy of AI systems through analysis, evaluation and technical feedback.

Responsibilities:

- Systematic evaluation of AI outputs (factuality, consistency, format, edge cases) with actionable findings reports.
- Analysis with **Python** to identify error patterns (sampling, categorization, validation).
- Estimated **~30%** accuracy improvement in a flight search/quotation use case through validation and iteration over the API integration.

Tools: Python, Pandas, PyTorch, Matplotlib, Seaborn, R.

Projects:

MolinosMarimbo

2026 - Present

• Automatic Bank Reconciliation with AI

Django/DRF backend for automatic and AI-assisted bank reconciliation: imports XLSX statements from 6 Argentine banks, proposes locally validated matches and leaves the final decision to an operator via API.

Stack: Django/DRF, Celery, Gemini, PostgreSQL, MinIO, Docker, Dokploy

Freelancer.com

2025 - Present

• Vales OCR: Handwritten Voucher Digitization

Production web platform (vales.mativigliancloud) that digitizes handwritten vouchers with AI-assisted OCR: matching against real customers with suggested aliases, manual review and batch loading into the ERP. JWT, strict CSP and automated deployment.

Stack: React, Django/DRF, Gemini (OCR), JWT, Nginx, GitHub Actions, Dokploy

Freelancer.com

Aug 2025 - Present

• Internal Operations & Finance ERP (Kretz)

Internal ERP for sales, expenses and current accounts with management dashboards. Expense entry/categorization and chart visualizations; focus on data consistency, performance and UX.

Stack: Django/DRF, React, Chart.js, PostgreSQL, Docker, JWT

Freelancer.com

Oct 2025 - Present

• Naranja Autoservicio (Django + React E-commerce)

Online store: catalog, stock, coupons, orders and statistics panel. Django/DRF backend with statistics endpoints; Vite/React frontend with WhatsApp checkout and CI/CD.

Stack: Django/DRF, React, PostgreSQL, Docker, CI/CD

No Country

May 2024 - Jun 2024

• CoinLatam (Real-time Crypto)

Crypto quotes platform with a modern interface and real-time data.

React/Next.js/Tailwind frontend and Node.js/Express + MongoDB backend.

Stack: React, Next.js, Node.js, MongoDB

Chainlink
Apr 2024 - May 2024

• **Block Magic: Chainlink Hackathon (P2Pbetting)**
P2P betting DApp: built 2 smart contracts in Solidity, React frontend and Hardhat testing/deployment to testnets (FUJI and AMOY).
Stack: Solidity, Hardhat, React, Chainlink, Tailwind CSS

Education:

Universidad Siglo 21
B.Sc. in Computer Science
(2025 - 2027)

Bachelor's Degree in Computer Science (in progress): Currently studying.
Scholarship for high academic performance (GPA above 8).

UTN
Systems Engineering
(2020 - 2025)

Systems Engineering (degree pending): Strong foundation in analysis and design (final courses pending).

ITBA University
Full Stack Developer
(2022)

Full Stack Program (Santander scholarship): Intensive training in web development and databases.

Courses & Certifications:

- Google Data Analytics (Coursera)
- Santander | Skills for Work — Santander Open Academy (2026)
- Modern Software Architecture: DDD, Events, Microservices (Udemy)
- SOLID Principles and Clean Code (Udemy)
